Market Commentary

Stocks rise, led by public investment stocks

The VN-Index popped higher at the open on Wednesday and traded in the green the entire session, closing up 0.6%, or 7.11 points, to reach 1,236.18. The HNX Index also closed higher by 0.6%, or 1.28 points, to 219.55. The total trading value on HoSE was higher than the Tuesday session by 21%, surpassing VND10.3tn (USD405mn). Gainers outnumbered losing tickers by more than 2:1 and nearly every sector gained.

During today's session, Financial Services (+1.1%), Chemicals (+1.0%) and Real Estate (+0.7%) outperformed the market, while Telecommunications (-0.7%) and Industrial Goods & Services (-0.2%) declined.

Public investment stocks attracted significant capital inflow, driving strong gains. Notable performers included FCN (+7.0%) and HT1 (+6.8%), both of which hit their ceiling prices, along with HHV (+4.2%), LCG (+5.5%), VCG (+5.1%), C4G (+5.2%), and BCC (+7.1%).

In 2025, Vietnam will continue to accelerate the implementation of key infrastructure projects, including the North-South Expressway Phase 2 (VND147tn, USD5.8bn), Long Thanh International Airport - LTIA (VND336tn, USD13.2bn), Ho Chi Minh City Ring Road 3 (VND75tn, USD3bn), and Hanoi Ring Road 4 (VND88tn, USD3.5bn).

This upward momentum coincided with the amended Public-Private Partnership (PPP) Investment Law, which took effect on January 15, 2025. The legislative changes will not only eliminate existing barriers but also expedite the execution of major projects, thereby creating substantial opportunities for enterprises in the construction and public investment sectors.

Foreign investors net sold today (VND406.1bn, USD16mn). Selling momentum focused on FPT (VND144bn, USD5.6mn), STB (VND133bn, USD5.2mn), and HPG (VND52bn, USD2.1mn). In contrast, buying focused on HDB (VND42bn, USD1.7mn) and KBC (VND38bn, USD1.5mn).

Top gainers today included MSN (+3.3%), HPG (+1.4%), HVN (+4.0%), VPB (+1.4%), and GVR (+1.6%). Top laggards included VCB (-0.3%), CTG (-0.5%), LGC (-6.9%), BCM (-1.1%), and STB (-0.9%).

Macro notes**General Secretary stresses technology as foundation for autonomous economy**

At the National Forum on Vietnam Digital Technology Enterprises today, Communist Party General Secretary To Lam highlighted the robust growth of Vietnam's digital technology sector. He noted that the sector generated an estimated revenue of USD152bn in 2024, supported by over 74,000 businesses.

He believes that 2025 presents a "golden opportunity" for Vietnam to solidify its international competitiveness within the digital technology sector, as it aspires to become a crucial node within leading Southeast Asian and global industry chains. Furthermore, the General Secretary urged businesses to "continuously overcome their limitations and collectively transform adversity into a catalyst for further growth."

Overall, these stances align with the recent establishment of the "Central Steering Committee for the Development of Science, Technology, Innovation, and Digital Transformation," led by the General Secretary himself. This signifies a strong Government commitment to technological advancement, and we believe these initiatives will be instrumental in helping us achieve the Government's ambitious 8% GDP growth target and ultimately propel Vietnam toward high-income status by 2045.

Update reports

VIC – Gradually turning the corner toward growth – HOLD

- We maintain our HOLD rating with 13.2% upside. We lower our TP by 2.2% while the share price has declined 1.2% since our last report.
- Our lower TP results from lower forecasted 2025 revenue for both property and manufacturing and a lower P/B target multiple.
- The current P/B of 1.1x is below its historical average and peers (residential property and automotive) average, reflecting cautious investor sentiment.

Financial Highlights

- 9M24 revenue declined 5.4% YoY to VND126.9tn (USD5.1bn), due to fewer property unit deliveries than 9M23. But 3Q24 revenue rose 49% QoQ and 31% YoY, reaching VND62.9tn (USD2.5bn).
- VIC completed the SDI divestment in VRE, receiving pre-tax income of USD852mn. 9M24 NPAT-MI surged 337% YoY to VND9.7tn (USD388mn).
- We forecast NPAT-MI to increase 482% YoY to VND12.6tn (USD497mn) in FY24 and 16%/14% YoY in FY25/26 to VND14.6tn (USD475mn) and VND16.6tn (USD658mn).

Investment Thesis

Solid backlog, strategic launches drive future property earnings growth

Vinhomes plans to leverage favorable markets and regulatory support with strategic property launches in 2025-26. Vinhomes Wonder Park (Ha Noi) and Apollo City (Quang Ninh) are going to be launched in FY25, then the HCMC market will be a key focus in FY26. Total unbilled bookings as of September 2024 rose 60% YoY to VND123tn (USD4.9bn). We forecast new contract sales to grow 10.7%/7.2%/19.4% YoY in FY24/25/26, respectively, reaching VND123tn (USD4.9bn) by FY26.

VinFast's global expansion to boost deliveries

By October, VinFast had 173 showrooms for EVs globally and 160 showrooms and service workshops for e-scooters. Its production capacity is set to expand significantly in FY25 with the opening of new factories in India, Indonesia, and Ha Tinh. These facilities will add a combined maximum capacity of 400,000 EVs annually. We expect VinFast to deliver 115,130 EVs/ 52,500 E-scooters in FY25.

Ramping up on the Vinpearl listing plan

Vinpearl JSC became a public company on November 15, with Vingroup currently holding an 85.5% stake. The company is proposing to the SSC a plan to issue over 70mn shares and plans to begin the process of listing on HOSE within 12 months following the share issuance. Listing on HOSE can enhance the company's transparency in financial and operational activities, as well as access to strategic investors, which will support funding activities and further expand its businesses.

Valuation reflects challenges of the EV sector

Our HOLD rating reflects cautious optimism as the company navigates challenges associated with the manufacturing segment. We believe that the prolonged investor caution underscores the need for greater clarity on the path to profitability to improve valuation sentiment. While the EV business represents a significant growth opportunity, its capital-intensive nature and VinFast's not yet reaching breakeven pose key risks.

NKG – 2025 EPS to decline due to aggressive share dilution – HOLD

- We maintain a HOLD rating on NKG with 12.5% downside. We revised down our TP to VND12,600 while the share price has decreased 10% since our last report.
- We lower our TP mainly because we revised down our FY24-25 earnings forecast by 42%/55% to VND482bn (USD19mn) and VND379bn (USD15mn), which grow 311%/-21% YoY, respectively. This adjustment is mainly due to a lower EBITDA margin and declining steel prices.
- NKG's TTM P/B is trading at 0.8x and will continue to be around this level or lower as the steel price continues to struggle in our long-term view and 2025F earnings will decline 21% with EPS to decline 54%.

Financial Highlights

- 3Q24 net revenue increased 22% YoY to VND5.2tn (USD216mn) thanks to a 32% rise in sales volume, despite an 8% YoY decrease in average selling price (ASP).
- 3Q24 net profit surged 174% YoY off last year's low base to VND65bn (USD2.7mn), although it experienced a 70% QoQ decline. For 9M24, net profit reached VND435bn (USD17.8mn), completing 52% of our old full-year forecast and 90% of our newly revised forecasts.
- 9M24 PBT of VND542bn (USD22mn) exceeds our FY24 PBT guidance of VND420bn (USD17mn) by 22%.

Investment Thesis

Global steel prices to struggle due to weak Chinese property activity

As the Chinese government shifts its growth focus away from property development, we believe that significant investments in this sector are unlikely, negatively impacting steel demand which primarily driven by property activity.

Neutral net impact from potential Vietnamese tariffs on imported steel

Higher HRC prices from new tariffs will increase input costs for galvanized steelmakers. However, this will also raise the average selling price (ASP) as costs are passed to buyers, boosting investor sentiment since HRC prices are a leading indicator for steel share prices.

2025 volume growth will moderate as NKG reaches 95% utilization rate in 2024

FY24 sales volume will grow 22% YoY, driven by a 37% increase in galvanized steel exports. In 2025, sales volume growth will moderate to single digits as NKG reaches a 90-95% capacity utilization rate in 2024.

Shares diluted as rights issue to finance new Phu My factory construction

NKG has secured around 30-40% of new capacity output, mainly for exports. To fund this expansion, NKG is raising around VND1,600bn (USD65mn) through a rights issuance at VND12,000/share. This 50% dilution will result in a 54% decline in EPS growth for FY25, while net profit is expected to decline by 21% YoY, as the Phu My factory will not generate revenue until 2026.

DISCLAIMER

This report has been prepared by VNDIRECT or one of its affiliates for distribution in Vietnam and overseas. The information herein is believed by VNDIRECT to be reliable and is based on public sources believed to be reliable. With exception of information about VNDIRECT, VNDIRECT makes no representation about the accuracy of such information.

Options, estimates and projection expressed in this report represent the current views of the author at the date of publication only. They do not necessarily reflect the opinions of VNDIRECT and are subject to change without notice. VNDIRECT has no obligation to update, amend or in any way modify this report or otherwise notify a reader thereof in the event that any of the subject matter or opinion, projection or estimate contained within it changes or becomes inaccurate.

The information herein was obtained from various sources and we do not guarantee its accuracy or completeness. Prices and availability of financial instruments are also subject to change without notice.

This published research may be considered by VNDIRECT when buying or selling proprietary positions or positions held by funds under its management. VNDIRECT may trade for its own account as a result of short-term trading suggestions from analysts and may also engage in securities transactions in a manner inconsistent with this report and opinions expressed therein.

Neither the information nor any opinion expressed in this report constitutes an offer, nor an invitation to make an offer, to buy or sell any securities or any option, futures or other derivative instruments in any jurisdiction. Nor should it be construed as an advertisement for any financial instruments.

Officers of VNDIRECT may have a financial interest in securities mentioned in this report or in related instruments. This research report is prepared for general circulation for general information only. It does not have regard to the specific investment objectives, financial situation or particular needs of any person who may receive or read this report.

Investors should note that the prices of securities fluctuate and may rise and fall. Past performance, if any, is no guide to the future. The financial instruments discussed in this report may not be suitable for all investors. Investors must make their own financial decisions based on their independent financial advisors as they believe necessary and based on their particular financial situation and investment objectives.

This report may not be copied, reproduced, published or redistributed by any person for any purpose without the express permission of VNDIRECT in writing. Please cite sources when quoting.
