Market Commentary

Stocks advance, led by utilities, transport

The VN-Index opened higher on Monday and was able to sustain positive momentum throughout the session to close up 0.5% at 1,234.7. Total trading value slightly dropped 6.6% from last Friday's already low level to VND11.8tn (USD464mn). The HN-Index also closed up 0.4% at 222.2.

The Utilities sector (+1.2%) gained thanks to recovery of the power sub-sector in anticipation of upcoming legislative changes to Vietnam's electricity law. The National Assembly is set to approve the revised Electricity Law on November 30, 2024, to address critical gaps in the current framework. These revisions are designed to remove obstacles for urgent power project investments, promote renewable energy development, and establish specific mechanisms for offshore wind and small-scale solar projects. POW (+6.5%) reached its ceiling price today to lead the utility sector, along with REE (+3.2%), and PGV (+1.5%).

The Transportation sector continued to rise following strategic partnerships by MVN with major global players such as Sinotrans, DP World, and MSC, which are expected to drive Vietnam's growing prospects in international shipping. Significant infrastructure developments, such as expansions at Lach Huyen and the upcoming Can Gio International Transshipment Port, further underscore the sector's potential. MVN (+7.3%) benefitted the most from this news, with other maritime stocks such as VLG (+3.2%), HAH (+1.7%) and VSC (+1.2%) also gaining.

Foreign trading momentum was split almost evenly today with marginal net buying of VND29.3bn (USD1.1mn). Buying momentum focused on MSN (VND89.4bn, USD3.5mn), CTG (VND55.1bn, USD2.1mn), PVS (VND52.8bn, USD2mn), KBC (VND51.8bn, USD2mn) and VHM (VND45.6bn, USD1.7mn). On the other hand, net sales include KDC (VND68.3bn, USD2.6mn), VCB (VND43.2bn, USD1.7mn), HDB (VND41.2bn, USD1.6mn) and VIB (VND39bn, USD1.5mn).

Top performers today included VHM (+2.6%), VCB (+0.7%), VIC (+1.3%), and POW (+6.5%). Top laggards were BID (-0.3%), MBB (-0.2%), and TMP (-4.7%).

25-Nov

Macro Notes**Sustained trade surplus of USD23.3bn YTD should help counter FX pressures**

According to Vietnam Customs, Vietnam's trade data for the first half of November highlights robust export and import growth. From the beginning of the year until November 15, export turnover rose 14.8% YoY to USD352.4bn. Key export sectors, including electronics, machinery, and textiles, have contributed significantly to this growth.

On the flipside, YTD import turnover increased 16.6% to USD329.1bn, driven by electronic goods, computers, machines, and equipment and tools. With that, Vietnam recorded a trade surplus of USD31mn in the first half of November alone and USD23.3bn YTD.

We see three positive trends emerge from the latest trade data, including: 1) continued robust double-digit YoY growth in both exports and imports; 2) increasing recovery in import demand for intermediate and capital goods, which is indicative of rising manufacturing activity and potential for further export growth; and 3) a sustained trade surplus of USD23.3bn, which is expected to provide support for the VND amid growing FX pressures due to a strengthening DXY, which continues to hover near 107.

Business Description

ACV was established in 2012, focusing on aeronautical services, including take-off and landing services, ground services, passengers services, security scanning services - and non-aeronautical services - including surface rental, billboard rental, parking, utilities, VIP sections and commercial services.

ACV - Bad debt reversal provision falls short – HOLD

- We change our rating from ADD to HOLD with 11.3% upside. We decrease our TP by 1.3% while the share price is unchanged since our last report.
- The main drivers of our TP decrease are increased provisions for doubtful accounts, delays in key projects and increasing market risks.
- Under IFRS, current TTM P/E of 36.2x is higher than its peer average of 28.4x. Our TP implies a lower P/E of 34.6x, with 46.6% FY24 EPS growth.

Financial Highlights

- We expect FY24/25 revenue to increase by 15.7%/13% YoY and net profit to increase/decrease 47.6%/6.3% YoY, respectively.
- We expect ACV to record bad debt provision of VND400bn (USD15.8mn) in FY24, followed by a reversal of VND536bn (USD21.2mn) in FY25.
- FY24/25 net financial income is forecast to be VND2.1tn/VND1.3tn (USD83mn/USD51.4mn).

Investment Thesis

Favorable macro indicators to maintain positive momentum in 4Q24

We revise up our net revenue forecast by 4.7% compared to our latest update report for FY24 to reach VND4.5tn (USD180mn). This revision is mainly driven by higher-than-expected container volume in GMD's port system. In detail, net revenue for 9M24 jumped 22.5% YoY to VND3.45tn (USD136.4mn), reaching 79.1% of our forecast. As a result, we raise our forecast for total container throughput (excluding GML) by 17.5% to reach 2.9 million TEUs in FY24. Vietnam's PMI increased to 51.2 in October 2024, and we believe this will maintain positive momentum in 4Q24.

Nam Dinh Vu 3 (NDV 3) to start contributing in 4Q25

According to GMD, Nam Dinh Vu 3 (NDV 3) began construction in October 2024 and is expected to start operations in 4Q25, increasing GMD's total capacity by 31%. As most of GMD's ports operate at full capacity, we forecast a slight 0.6% YoY rise in operating profit for FY25, marking 2.8x growth from FY20 and a CAGR of 22.8% from 2020 to 2025. We also expect a 10.5% revenue surge, with NDV 3 fulfilling 65% of its capacity in FY26.

Gemalink (GML) secures long-term growth prospects

In 10M24, BR-VT experienced a 98% YoY increase in FDI, leading the Southern provinces. This is expected to boost export-import volumes in CM-TV, making it a growth hotspot. We believe this will support GML's long-term prospects because: 1) its expansion plans will double its capacity, making it the largest port in the CM-TV cluster; and 2) GML's volume remains stable due to a solid operating strategy from its main partner.

GMD deserves a premium P/B as the best listed port operator

Compared to the book value as of September 30, 2024, the current price reflects a P/B of 2.5x, which is higher than domestic peers (1.9x) and the regional average (2.5x). Our target price implies a P/B of 2.5, which is at the +1 standard deviation level.
